I am a Full-Stack Web Developer with a background in Analytics, Tech repair, and Health care. My central Passions revolve around model construction in the scientific method and the world of building website development. I have experience in creating applications using technologies such as those included in the mern stack: mongo, express, react, node, but I am further eager to pick up new technologies along the way. Outside of the world of science and computers, I am fundamentally a people person with a love of building relationships, and an eagerness to learn the ropes of new cultures in varied environments.

SKILLS

Web Development: Express.js, React.js, Node.js, JavaScript ES5/ES6, Handlebars.js, JQuery, JSON, AJAX, HTML, CSS, Heroku, REST APIs, Twitter Bootstrap, Sequelize, Google Materialize, Spectre.CSS

UX/UI: Adobe Suite / Illustrator, Photoshop

Databases: MongoDB, MySQL, FireBase, Python, Algorithms, Data Structures

Miscellaneous: Windows, Git/Github, Google Suite, Microsoft Suite, macOS

APPLICATIONS

BrainGuage | <https://github.com/JKobygold/BrainGauge> | <https://braingaugefinalproject.herokuapp.com/>

- **Summary of application :** BrainGuage is an application that measures that centrally does one thing: It correlates one's lifestyle to their performance in a speed reaction game. The game is built to test the hypothesis that altering variables in one's daily schedule such as their eating or regiments will also alter their reacting time.
- **My contributions:** I primarily designed the flow of the user experience, and built the game and its connection to the database
- **Technologies used:** Javascript, React, CSS, Bootstrap, Apex Charts, Heroku, Mongoose

BirdWatcher <https://bit.ly/2ASUhlh> | <https://jkobygold.github.io/clicky-game-2/>

- **Summary of application :** A memory game constructed in React.Js with photographs in where the user must avoid clicking the same photograph twice.
- **My contributions :** this was built without other contributors.
- **Technologies used:** React, Javascript, Hover-CSS, Bootstrap

Experience-the-Music | <https://bit.ly/3cDDA0U> | <https://jkobygold.github.io/Project-1/>

- **Summary of application:** An application designed to consolidate
- **My contributions:** Primary contributions: Bootstrap and CSS styling
- **Technologies used:** Javascript, HTML, Bootstrap

EXPERIENCE

Walden Counseling - Intern: Professional Assistant

May 2018 - Present
